BLOCK FOR SCREEN

The image displays two screenshots of the MIT App Inventor web interface, showing the logic blocks for a screen named 'Screen1'.

Top Screenshot: The interface shows the 'Blocks' panel on the left and the 'Viewer' panel on the right. The 'Blocks' panel lists various built-in blocks, including Control, Logic, Math, Text, Lists, Dictionaries, Colors, Variables, Procedures, and Screen1. The 'Viewer' panel shows a single logic block: a 'when Button1 Click' block with a 'do open another screen screenName login' block.

Bottom Screenshot: The interface shows the 'Blocks' panel on the left and the 'Viewer' panel on the right. The 'Blocks' panel lists various built-in blocks, including Control, Logic, Math, Text, Lists, Dictionaries, Colors, Variables, Procedures, and DB. The 'Viewer' panel shows three logic blocks: a 'when Button2 Click' block with a 'do open another screen screenName DriverCreation' block, a 'when complaints Click' block with a 'do open another screen screenName viewcomplaints' block, and a 'when Button6 Click' block with a 'do open another screen screenName report' block. Additionally, there is a 'call FirebaseDB1 GetValue' block with 'tag Label5' and 'valueIfTagNotThere {NA}'.
